QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor :

R. J. MURGATROYD

Vol. **91**, 1965

LONDON :
ROYAL METEOROLOGICAL SOCIETY
49 CROMWELL ROAD, LONDON, S.W.7
1965

CONTENTS OF VOLUME **91**

PAGE

A. A. Townsend—The interpretation of stellar shadow-bands as a consequence of turbulent mixing 1

S. K. Kao—Some aspects of the large-scale turbulence and diffusion in the atmosphere 10

T. V. Crawford—Moisture transfer in free and forced convection.. 18

P. Frenzen—Determination of turbulence dissipation by Eulerian variance analysis 28

J. D. Woods and B. J. Mason—The wake capture of water drops in air 35

P. B. MacCready and A. Proudfit—Observations of hydrometeor charge evolution in thunderstorms 44

P. B. MacCready and A. Proudfit—Self-charging of melting ice 54

R. Reiter—Precipitation and cloud electricity 60

Shorter Contributions—

D. V. Booker—Exchange between water droplets and tritiated water vapour 73

D. Stott and W. C. A. Hutchinson—The electrification of freezing water drops .. 80

J. Latham—The mass loss of water drops falling in electric fields 87

S. G. Cornford—Fall speeds of precipitation elements 91

J. M. Powell—Changes in amounts of sunshine in British Columbia, 1901-1960 .. 95

Correspondence—

J. Latham and C. D. Stow—Electrification produced by collision between ice crystals and soft hail pellets in a thunderstorm 99

J. R. Scott; H. W. Sansom—The use of pressure tendencies in East Africa 100

D. R. Davies and G. P. Williams; R. C. Smith—A derivation of the meridional velocity profile 101

Discussions—

R. Dixon—Deepening of wave depressions in relation to geostrophic vorticity advection at 300 mb (*Q.J.*, **90**, p. 175) 103

P. Ramm and F. W. G. Warren—Gravity-wave dispersion under wind shear in two model atmospheres (*Q.J.*, **89**, p. 349) 103

R. S. Scorer and S. D. R. Wilson—Secondary instability in steady gravity waves (*Q.J.*, **89**, p. 532) 104

Proceedings at meetings of the Society.. 106

Reviews—

Atmospheric radiation, **I**, Theoretical basis, R. M. Goody (C.D.W.); *Changes of climate*, Proceedings Rome Symposium, 1961 (G.M.); *Einführung in die Physikalische Klimatologie*, M. Hendl (H.H.L.); *Climatic factors and agricultural productivity*, Proceedings Aberystwyth Symposium, 1963 (R.W.G.); *Allgemeine Klimageographie*, J. Blüthgen (H.H.L.) .. 108

Obituary Notices 112

S. Chapman and P. C. Kendall—Noctilucent clouds and thermospheric dust : their diffusion and height distribution 115

S. D. R. Wilson—Instability in a geostrophic wind with a transverse wind-speed gradient 132

G. B. Tucker—The equatorial tropospheric wind regime 140

A. J. Dyer—The flux-gradient relation for turbulent heat transfer in the lower atmosphere 151

J. B. Tyldesley and C. E. Wallington—The effect of wind shear and vertical diffusion on horizontal dispersion 158

N. Thompson—Short-range vertical diffusion in stable conditions 175

L. G. Veitch—The description of Australian pressure fields by principal components 184

G. O'Mahony—Rainfall and moon phase 196

G. J. Haltiner and D. E. Caverly—The influence of friction on the growth and structure of baroclinic waves 209

Shorter Contributions—

W. Klug—Diabatic influence on turbulent wind fluctuations 215

M. K. Arora—A note on high velocity modes of the atmosphere 218

G. G. Bowman and K. L. Shrestha—Atmospheric pressure waves from the Japanese earthquake on 16 June 1964 223

H. W. Baynton, H. L. Hamilton, Jr., P. E. Sherr and J. J. B. Worth—Temperature structure in and above a tropical forest 225

Correspondence—

H. T. Mantis; S.-K. Kao—On the spectrum of geostrophic winds 233

A. Court—Undulance and turbulence 234

Discussions—

N. E. Rider, J. R. Philip and E. F. Bradley—Horizontal transport of heat and moisture – a micrometeorological study (*Q.J.*, **89**, p. 507) 236

H. A. Panofsky and A. A. Townsend—Change of terrain roughness and the wind profile (*Q.J.*, **90**, p. 147) 240

P. M. Saunders—Sea smoke and steam fog (*Q.J.*, **90**, p. 156) 242

A. A. Townsend—Natural convection in water over an ice surface (*Q.J.*, **90**, p. 248) . 243

Proceedings at meetings of the Society 246

Reviews—

The mechanics of aerosols, N. A. Fuchs (B.J.M.); *Particulate clouds, dusts, smokes and mists*, H. L. Green and W. R. Lane (B.J.M.); *Physics of the boundary layer of the atmosphere*, D. L. Laikhtman (F.B.S.); *Atmospheric pollution – its origins and prevention*, A. R. Meetham, D. W. Bottom and S. Cayton (F.P.); *Understanding weather*, O. G. Sutton (E.G.); *Report of the Meteorological Office, 1963* (F.K.H.); *Solar plasma, geomagnetism and aurora*, S. Chapman (J.P.); *The English climate*, H. H. Lamb (F.K.H.); *A colour guide to clouds*, R. S. Scorer and H. Wexler (C.K.M.D.); *Seasons and prices – the role of the weather in English agricultural history*, E. L. Jones (R.W.G.) 249

Obituary Notices 254

S. K. Runcorn—Symons Memorial Lecture for 1964 – Geophysics and palaeoclimatology 257

D. R. Grant—Some aspects of convection as measured from aircraft 268

D. O. Staley—Radiative cooling in the vicinity of inversions and the tropopause .. 282

S. Berman—Estimating the longitudinal wind spectrum near the ground 302

F. B. Smith—The role of wind shear in horizontal diffusion of ambient particles .. 318

E. J. Williamson and J. T. Houghton—Radiometric measurements of emission from stratospheric water vapour 330

Shorter Contributions—

H. A. Panofsky and I. A. Singer—Vertical structure of turbulence 339

A. J. Dyer and T. V. Crawford—Observations of the modification of the microclimate at a leading edge 345

R. A. Hamilton—Secular and other changes of atmospheric electrical potential gradient at Lerwick 348

J. D. Woods—The effect of electric charges upon collisions between equal-size water drops in air 353

G. B. Tucker—The divergence of horizontal eddy flux of momentum in the lower equatorial stratosphere 356

J. A. Davies—Estimation of insolation for West Africa 359

C. J. Sumner—A long-period recorder for wind speed and direction 364

Correspondence—

C. B. Moore; W. C. A. Hutchinson—Lightning discharge and precipitation .. 368

B. Vonnegut; J. Latham—Electrification of frost deposits 369

Discussions—

C. V. Wilson and W. L. Godson—The structure of the arctic winter stratosphere over a 10-yr period (*Q.J.*, **89**, p. 205) 375

J. Latham—Charge transfer associated with temperature gradients in ice crystals grown in a diffusion chamber (*Q.J.*, **90**, p. 266) 378

J. B. Matthews and B. J. Mason—Electrification produced by the rupture of large water drops in an electric field (*Q.J.*, **90**, p. 275) 379

J. R. Probert-Jones—An analysis of the fluctuations in the tropical stratospheric wind (*Q.J.*, **90**, p. 15) 380

K. R. Ramanathan—Bi-annual variation of atmospheric ozone over the tropics (*Q.J.*, **89**, p. 540) 381

R. C. Smith—A derivation of the meridional velocity profile (*Q.J.*, **90**, p. 338) .. 381

TABLE OF CONTENTS

PAGE

Report of the Council for 1964 383

Proceedings at meetings of the Society 396

Reviews—

Traité de glaciologie : Glace, Neige, Hydrologie Nivale, L. Lliboutry (J.T.B.); *The structure of atmospheric turbulence*, J. L. Lumley and H. A. Panofsky (J.B.T.); *Physics of the air*, (3rd edn), W. J. Humphreys (R.J.M.); *The flight of thunderbolts*, B. Schonland (J.H.); *The history of the barometer*, W. E. K. Middleton (A.L.M.) 400

Obituary Notices 403

Frontispiece : J. S. Sawyer, M.A., F.R.S.

J. S. Sawyer—*Presidential Address :* The dynamical problems of the lower stratosphere 407

Discussion Papers :

F. K. Hare—Stratospheric dynamics north of 40°N 417

R. J. Murgatroyd—Tracers and transfer problems in the lower stratosphere 421

General Discussion 424

M. S. Longuet-Higgins—*Symons Memorial Lecture for 1965*—Some dynamical aspects of ocean currents 425

A. W. Brewer and A. W. Wilson—Measurements of solar ultraviolet radiation in the stratosphere 452

J. Latham and C. D. Stow—The influence of impact velocity and ice specimen geometry on the charge transfer associated with temperature gradients in ice .. 462

G. P. Williams and D. R. Davies—A mean motion model of the general circulation .. 471

A. J. Troup—The 'southern oscillation' 490

Shorter Contributions—

D. Colson and H. A. Panofsky—An index of clear air turbulence 507

K. L. Calder—On the equation of atmospheric diffusion 514

R. J. Charlson—Noctilucent clouds : a steady-state model 517

Discussion Meeting, 17 March 1965 on 'Synoptic analysis'

D. M. Houghton—Current forecasting practice 524

F. H. Bushby—Automation in analysis 527

F. H. Ludlam—Analysis of large-scale atmospheric motion 529

General Discussion 531

Correspondence—

L. Jacobs; J. L. Monteith—The validity of solar radiation data for the British Isles .. 533

R. List; S. G. Cornford—Fall speeds of precipitation elements and aspects of similarity theory 535

N. P. Sellick—Pressure fields and divergence 537

J. Latham and C. D. Stow—Observations of hydrometeor charge evolution in thunderstorms 539

Discussions—

H. H. Lamb—Trees and climatic history in Scotland (*Q.J.*, **90**, p. 382) 542

H. W. Sansom—The use of pressure tendencies as an aid to forecasting in East Africa (*Q.J.*, **90**, p. 298) 550

Proceedings at meetings of the Society 552

Reviews—

Meteorological and radiational regime of Antarctica, N. P. Rusin (C.I.J.); *Atmospheric processes in the high latitude of the Southern Hemisphere*, P. D. Astapenko (H.R.P.); *Problems in palaeoclimatology*, A. E. M. Nairn (Ed.), (G.M.); *Environmental measurement and interpretation*, R. B. Platt and J. F. Griffiths (R.E.L.); *I.G.Y. Antarctic Expedition*, Vol. IV, *Meteorology, Glaciology, Appendices*, D. Brunt (Ed.), (H.H.L.); *Cloud structures and distributions over the tropical Pacific Ocean*, J. S. Malkus and H. Riehl (I.J.W.P.) .. 555
